# Pending Tasks — Owner Checklist

Team USA Sales, Inc. · CU Inspections of South Florida · Prepared by ☁️ Claude (Cloud) · Tuesday, October 13, 2026, 8:30 AM

**11**

**Things Claude can do**

Sheet 1 · no clicks needed from you, except where marked “needs your yes”.

**8**

**Things only you can do**

Sheet 2 · each one is one small action. Do #1 first; it unlocks most of Sheet 1.

**Index**

☐ **p.1** Cover sheet — this page

☐ **p.2** Sheet 1 — What Claude can do

☐ **p.3** Sheet 2 — What you need to do

**The one thing that matters most**

Your desktop helper (RAMBO) has been silent since **October 10**. OCR, read-aloud, the 10 tasks moved to RAMBO, and the PC-side panel pieces all wait on it. **Sheet 2, item 1** is the fix.

**Done yesterday and today (already finished)**

Control panel: picture map, tabs in rows with % built, priorities, hover help, red flags, Emails menu, Agents in cloud / desktop, Google Drive search, OCR page · Approve all saved (138 tasks, 11 cards, 3 schedules) · OCR counted: Drive 89%, OneDrive 0%, Gmail and Outlook not OCR’d · Read-aloud directive written and shared.

☐ = tick when done · “needs your yes” = Claude waits for one word from you.

# Sheet 1 — What Claude can do

In order. Claude starts these on its own unless marked “needs your yes”.

- [ ] **1** **Fix the OCR runner before it is installed**
  It would redo finished files. Upgrade it to the newest OCR standard.

- [ ] **2** **Pull text from typed PDFs in Google Drive**
  needs your yes
  Restarts part of OCR from the cloud. Scanned pages still need the PC.

- [ ] **3** **Send RAMBO one short order for the 10 tasks moved to it**
  So they are not lost while the desktop is silent.

- [ ] **4** **Panel: Document Library page**
  Your 209 library documents, opening from Google Drive instead of the G: drive.

- [ ] **5** **Panel: hand-off packet builder with a Copy button**
  Pick a task, it picks the cheapest helper, one button copies the instructions.

- [ ] **6** **Panel: Menu finish**
  Coming-soon boxes, word explanations (TRK, OPH…), text size A− A+, high contrast.

- [ ] **7** **Job queue: connect a worker that picks up your sent jobs**
  Today jobs wait in line; nothing picks them up yet.

- [ ] **8** **OneDrive duplicate check (read-only report)**
  About 4,000 possible duplicate scans. Report only; nothing deleted.

- [ ] **9** **Hashtag index for every job file**
  Design the tag index the search box reads. Writing tags on the PC waits on RAMBO.

- [ ] **10** **Miami-Dade access letter: final version**
  Get a real tracking number and verify contacts. Nothing is sent without your “send”.

- [ ] **11** **Keep watching every hour**
  Relay any result from the PC to you in plain words.

# Sheet 2 — What you need to do

Each is one small action. Do #1 first.

- [ ] **1** **On your PC, open the Claude Code window and click “Allow” if it asks**
  Leave it open. This wakes up RAMBO and unlocks most of Sheet 1.

- [ ] **2** **Say “yes” or “no” to Claude pulling text from typed PDFs in Drive**
  One word in the chat.

- [ ] **3** **Read-aloud: try it today with no install**
  In Edge: highlight a reply, right-click, “Read aloud selection”. The one-key version installs when RAMBO wakes.

- [ ] **4** **Copilot’s panel design**
  In Copilot open “Continue Previous Conversation”, press Ctrl+A then Ctrl+C, and email it to yourself with the subject COPILOT PANEL DESIGN.

- [ ] **5** **Tell Claude your second Microsoft email address**
  So it can be added to the Emails menu. Or say “none”.

- [ ] **6** **Printer scan CCO_000001: PDF or picture?**
  One word: “PDF” or “picture”.

- [ ] **7** **Miami-Dade access letter: say “send” when Claude shows the final version**
  Nothing goes out before that.

- [ ] **8** **Later: OneDrive duplicates**
  After the report, say yes per batch. Nothing is deleted without your yes.
