The picture: how work flows

The heartbeat: every 5 minutes the PC writes a tiny "I'm awake" note. If the note stops changing, the watchdog knows something is wrong and emails you. **Right now the Inbox pick-up program (the poller) is broken.** PASTE-D-063, pasted into Jorge-PC, fixes it.

The story (for a five-year-old)

Once upon a time there was a busy boss named Jorge. He had too many jobs to do all by himself, so he got a team of robot helpers.

The Planner robot lives far away in the clouds. It is very good at making lists. It can't touch Jorge's computer, but it can write notes and check everyone's work, like a teacher checking homework.

The Night robot lives inside Jorge's computer at home. When Jorge goes to sleep, the Night robot wakes up and works. It sorts papers, counts things and makes new lists. Every time it finishes one job, it puts a note in a special mailbox, so nothing gets lost.

The Mail robot reads Jorge's letters and his calendar. It can write a letter, but it always leaves it on the table for Jorge. It never mails anything by itself.

Every five minutes the Night robot says "I'm awake!" by writing a tiny note. A **guard dog robot** checks the notes. If the notes stop, the guard dog barks by sending Jorge an email.

There is one big rule: **the robots never spend money, never send letters to other people and never throw away papers. Only Jorge can say yes to those.** They put those questions on one list, and Jorge answers it once a day.

Right now the Night robot's ears are broken. It can't hear new jobs. Jorge fixes the ears by pasting one message, called PASTE-D-063, into the Jorge-PC window. Then the Night robot hears again, and the team works all night. The end.

The task list: who does what, in what order

#	Task	Who	Status	Estimated finish (Miami)
1	Fix the night engine: rebuild the poller, write 2 result files (PASTE-D-063)	Desktop	Waiting for the paste	About 15 min after paste
2	Wally lead list: group 1,912 unsafe-structure owners	Desktop	Queued	Tomorrow 7:00 AM
3	Cash: match invoices to payments (read-only)	Desktop	Queued	Tomorrow 7:00 AM
4	OCR PDFs already in a job folder (filler)	Desktop	Queued	Until 7:00 AM
5	Night report "X of N"	Desktop	Queued	Tomorrow 7:00 AM
6	Check the 2 result files in Drive	Cloud	Scheduled	Tonight 7:35 PM
7	Watchdog	Cowork	Every 4 hours	Next: tonight 7:14 PM
8	CDM tax-credit model (84%)	Cowork	Running	Waits on "CDM: GO"
9	Plaud transcripts	Cowork	Daily	Tomorrow 7:15 AM
10	Business inbox triage	Cowork	Weekdays	Tomorrow 7:45 AM
11	Morning report	Cloud	Overnight	Tomorrow 8:00 AM
12	Plaza progress report draft (failed last time)	Cowork	At risk	Wed 9/30 7:30 AM
13	Lien lists: 50 homes + 50 commercial, 2 CSVs	Cowork (proposed)	Needs your yes	About 2 days after yes
14	Unit 29 rework upload (C2026170181)	Desktop	On hold	Same day as your OK
15	Codex backup helper	Codex	Idle	Needs your one sign-in
16	Grok	Grok	No tasks, not connected	n/a
17	17 owner gates (top 3 free 25 jobs)	Jorge	Waiting on you	Any time
